Club night dive, 10 attending. Went in off SE point and headed S and the W to Deep Wall. Good current pushing us along. Water cold (16.3C) but clean, 10 m viz. Found a couple of RIF near start. Back near normal DW spot, at least 20 PJs. Went ...

Club deep dive. Was supposed to be Tuggerah but winds started getting strong so we decided to dive deep reef. Huge seas, some 4+m, but safe. Viz not too bad on way down but at the bottom jellyfish! And more jellyfish! Viz was about a metre, but if you had a gap, perhaps 10 m. Went along the wall using reel. At end, anchor moved and had trouble refinding Gary and it till he shone his torch. An interesting dive! Visibility very shithouse.

Club BBQ and boat dive day, 5 boats, almost 40 divers. Seas dropped dramatically from yesterday, but still 2 m. I did the second run. Lots of "whale snot" on bottom reducing visibility. Saw 1 sea dragon, a few six-spined leatherjackets and PJs. Kelly on first dive found 3 PPHs and some saw 2 blue devilfish. Reasonable dive, great day. Visibility fair.

Club boat dive. Conditions a lot better than expected, seas almost flat and no wind. However, current from N. When first lot went in only slight, but by the time we surfaced, very strong, taking 12 m deco line to about 5 m! Had to cut short safety stop. Anyway, very nice dive. Found a large donut (rose-ringed) nembrotha in the same place as normal. Not as many bastard trumpeters around. Visibility good.

Cancelled another boat dive due to weather, so came here. Outgoing tide but absolutely no current. Very flat here, but seas very rough outside. Found two of the patchwork tritonia nudis that look like soft corals and a sea horse. Some saw a tiny sea dragon. Nice easy dive. Visibility fair.

Club boat dive, 3 boats and 11 divers. Flat seas, bluish water and no current. Anchored in Split and did the normal route. Kelly found a PPH but there were no donut nembrothras. Went thru The Tunnel and back near The Cave there was a medium sized bullray. Not as many bastard trumpeters as usual. Excellent dive. Visibility very good.

Club deep dive. After yesterday's flat seas and great conditions, we were hopeful. Finally, an excellent day, same as yesterday. Anchored first go on steering gear. Slight current on way down, warm (19.5C) up top but 14.5C on bottom. Went around prop and forward to bow. Not as many fish as normal, but a few bailer shells. Back to boiler. The metal which used to be on the northern side of the boiler (in reality on the top of it) has moved out and you can now swim between it and the b...

Went out with Peter Fields. Very clean and warm (20C+) on top and slight current from N. At 20 m very dirty till 24 m and then clean again. However, very cold at 14.4C. Anchored on W boiler. Went to engine and prop and to other boiler and then forward of W boiler. Back to engine area and then up. 17 mins on bottom. Great dive. Visibility good.

Club Xmas party. Went off W point, a bit rough but not too bad. Very clean on bottom but cold, 15.8C. Drifted back in but hardly any current. Found 7 PPH, including one about 5 mm long. One RIF, the same one seen Thursday night on RIF Reef. Paul W saw an angelshark and a fiddler-ray. Much warmer shallower but dirty. Visibility very good.

Club boat dive. Slight W wind when we got there and reasonable swell. However, wind picked up to over 25 kts. Lots of jellyfish, in spots only 3 m viz. Elsewhere, probably 7 m. Bastard trumpeters and seapike as normal. Saw a seal before we went in, but not underwater. Saw a blue devilfish. Not a great dive. Visibility fair to poor.

No wind at all, no current and calm. However, site covered in foam. Very dark on bottom but reasonable viz. Went along Split to N. When we exited to sand millions of jellyfish made the viz only 2-3 m. Cleared about 50 m S. Went to cave and then back. All the normal fish, but no donut nemrothas again. Visibility fair.

Club boat dive. S forecast for sometime this morning. I figure we need to go close to port and not north, so we do here. Calm and little wind when we anchor. Dirty top but clean bottom. Lots of fish. A few minutes after getting back on the boat 5 hit, but only 8 kts at first. Then strong. By the time last group up it was 35+ kts. Very hairy trip back, even inside. Glad to be back on land. Visibility very good.

Cancelled boat dive last night as winds were still over 30 kts but it then dropped overnight. We dived here instead. Best viz for ages, at least 15 m. Saw horned shark, wobegong shark, a few octopus and moray eels, 6 pineapplefish, frogfish, lots of yellowtail and seapike. So nice to dive here when viz is this good. Visibility very good.

My 3,400th dive. Second Club dive. Went of W point to IR but now outgoing tide took us a bit off direction. Ended up on 15 m Reef. Then along inside of IR1 and then IR2. A few PPH, no RIF. At the end of IR2 there are huge changes, with enormous boulders moved off the top of the reef to the sand and ones from the main wall pushed out. Looks totally different. Another great dive, viz still good deep. Visibility good.
