Comments (Suggestions: location, activity, specialty, dive boat, diving conditions, equipment, aquatic life, water temperature, weight used, underwater geography/topography) On the third attempt we got to the shot line we needed to set up the deco bottle at the bow. Current was savage. Second attempt I couldn't get it and came up. Third attempt I had to kick for billies to grab hold of the line. Then it was a great drift along the wreck to set up the other bottle. Free swimming turtle (and a few on the surface) sea snake, bat fish. Grant Trevally.
Short dive, but excellent. It is a fantastic wreck.

Today is a sombre day though, as Tina, one of our divers, on her honeymoon died. He was on our way back to port now, after the first dive of the trip.
